

*Electronically puts the zap on
itching & swelling bug bites*

Safe Non-Toxic - Bite Zapper works by sending safe and painless micro-pulsed electric currents through the skin affected by mosquito, flea, spider, and other bug bites

Stops the Itching - This stops the release of histamine (the source of itching and swelling).

Instant Relief - Most bites stop itching and swelling after a single 30 second application.

Item # : Zapp-G1000-32
